IN STOCK 04/2022	Common Name	Botanical Name	Description	Hardiness Zones	Height
<p><i>Lavandula angustifolia</i> 'True Lavender' or 'English Lavender'</p> <p>Produces small, tight flower clusters set against blue-green leaves and blooms in the early part of the season. These hardy lavenders perform well for northern gardeners, overwintering to zone 5. These lavenders are fragrant and the first choice for culinary gardeners.</p>					
Y	Ellagance Purple	<i>Lavandula angustifolia</i> 'Ellagance Purple'	Deep purple flowers bloom the first year on large, dense spikes. Plants are bushy, uniform, and well-branched. 2008 FleuroSelect Gold Award Winner. Edible Flowers: The flowers can be used to garnish desserts and as a distinct flavor element in baked goods. Flavor is sweet and floral, and pair well with citrus, berries, nuts, mint, and cinnamon.	5 to 9	12 to 14 inches
Y	Folgate	<i>Lavandula angustifolia</i> 'Folgate'	Compact bush with bright violet flowers. Excellent culinary lavender variety. Super oil yield. Great oil quality – very “sweet” scent. Large robust plant. Great culinary use. Early bloomer.	5-9	20 to 24 inches
Y	Forever Blue	<i>Lavandula angustifolia</i> 'Forever Blue'	Forever Blue Lavender has a compact and upright growth habit and deep blue flowers from summer until fall.	6 to 9	14 to 24 inches
N	Hidcote	<i>Lavandula angustifolia</i> 'Hidcote'	'Hidcote' is a classic semi-dwarf English lavender, growing to 18 inches in flower. This variety is excellent for drying, and makes a good culinary selection. Very Dark Color Good for containers.	5 to 8	12 to 18 inches
Y	Munstead	<i>Lavandula angustifolia</i> 'Munstead'	Munstead' is a short, bushy lavender, growing to no more than 18 inches high in bloom. Considered one of the hardiness varieties of English lavender, it is a very early spring bloomer. Like 'Hidcote' it is an excellent choice for culinary creations. Highly fragrant foliage as well as flowers, Munstead low growing habit makes it an excellent choice for containers.	4 to 9	12 to 18 inches
<p><i>Lavandula pinnata</i> Fern Leaf Lavender</p>					
N	Pinnata Bucci	<i>Lavandula pinnata</i> var. <i>buchii</i>	Loose upright growth with gray feathery leaves. Tall branching spikes of pale violet flowers appear from spring to fall. Flowers are good for cutting, drying and preserving. This plant is attractive to bees, butterflies and/or birds Cold sensitive and often grown as an annual.	9 to 11	20 to 24 inches
<p><i>Lavandula x gingsinsii</i></p> <p>It is speculated to be a cross between <i>L. dentata</i> and the woolly white foliaged species <i>Lavandula lanata</i> - this hybrid cross has been given the name <i>Lavandula x gingsinsii</i> named in honor of Baron Frederic Charles Jean Gingsins de la Sarraz (1790-1863), who wrote an early monographic on <i>Lavandula</i>.</p>					
Y	Goodwin Creek	<i>Lavandula x gingsinsii</i> 'Goodwin Creek'	Drought resistant and heat loving, Goodwin Creek lavender is perfect for planting in rock gardens and along pathways. The blooms are dark blue and longer on the stem than other lavenders. The fuzzy grey foliage makes a nice contrast against the dark blue blooms	7 to 9	30 to 36 inches

<i>Lavandula x heterophylla</i>					
N	Sweet	<i>Lavandula x heterophylla</i>	A tall and hardy lavender, this variety dates back to the early 1800's. Sweet Lavender is suitable for growing in hot, humid climates. The fragrance is of lemon and lavender with pine undertones, which is quite different to most French Lavenders. The buds of L. heterophylla can tend to drop off the stalks if picked fresh, so they do not always do well as cut flowers or dry as well as other varieties.	8 to 11	36 to 48 inches
<p><i>Lavandula x intermedia / Lavandin</i></p> <p>Lavandula x intermedia are tall and tough lavender's hardy to 5 degrees F, however they will not tolerate damp conditions. They all have broader leaves and longer flower stalks than the angustifolia species, making them particularly suited to using as a cut flower. They work best as a specimen in a borders, in a pot, or as an informal flowering hedge. The evergreen nature of the silvery leaves make it an ideal hedging and garden plant, giving structure to a garden throughout the year. The flowers are very attractive to bees. "Lavandins" are English Lavender Hybrids (Lavandula x intermedia) that bloom later than species lavenders and have a higher essential oil content. They have large, gray-green leaves and are known for their speedy growth and strong fragrance.</p> <p>This group features some of our most popular lavender cultivars, including 'Provence,' the famous perfume lavender, 'Phenomenal,' and 'Grosso'.</p>					
Y	Bridget Chole	<i>Lavandula x intermedia 'Bridget Chole' PP 27,182</i>	Lavandula 'Bridget Chloe' is an exceptional lavender in field trials, which is nearly unheard of in the heat, humidity, and summer rains of the Southeast US. The leaf spot resistant, grey foliage clothes the 30" tall x 5' wide, compact clump. The plants are covered with flower spikes of vivid purple flowers from mid-June through early summer. Lavandula 'Bridget Chloe' was awarded the 2021 Gold Award of Excellence by the International Perfume Foundation.	5 to 9	30 to 36 inches
Y	Dutch	<i>Lavandula x intermedia 'Dutch'</i>	Dutch Lavender is one of the hardiest lavenders you can plant in your garden. This Lavender has large clear purple spikes, light silver foliage, vigorous growth, and is widely used in northern regions for its good hardiness and resistance in cold and wet winter conditions.	5 to 9	24 to 30 inches
N	Edelweiss (White)	<i>Lavandula x intermedia 'Fred Boutin'</i>	A beautiful hybrid lavender best known for its long, attractive silver-grey leaves. It blooms mid-to-late summer with tall stems of purple flowers. Sweetly fragrant. Excellent cut flowers for fresh or dried arrangements. Popular for sachets and potpourri.	5 to 9	18 to 24 inches
Y	Fred Boutin	<i>Lavandula x intermedia 'Edelweiss'</i>	Compact growth habit. Long white flowers. (Grosso family)	5 to 9	24 to 30 inches
Y	Grappenhall	<i>Lavandula x intermedia 'Grappenhall'</i>	Lavender 'Grappenhall' is a strongly aromatic shrub, it is one of the tallest lavenders. The flowers of Lavender 'Grappenhall' are pale mauve, produced on spikes at the top of slender, leafless stems 10 to 15 inches long, making an excellent choice for cut flowers.	5 to 11	24 to 30 inches
Y	Gros Bleu	<i>Lavandula x intermedia 'Gros Bleu'</i>	Vigorous producer of deep blue velvet spikes. Light and fresh fragrance. (Grosso family)	5 to 9	20 to 24 inches

Y	Grosso	<i>Lavandula x intermedia 'Grosso'</i>	High oil content from dark violet flowers. Tight foliage and fan-like flowering habit. Superb oil yield Standard for lavandin oil Long, uniform stems Great for dried bundles & buds.	5 to 9	24 to 30 inches
N	Platinum Blonde	<i>Lavandula x intermedia 'Platinum Blonde'</i>	This is a selection of Hybrid Lavender, or Lavandin. This forms an evergreen, bushy mound of wide grey-green leaves, edged in creamy-white. Long spikes of medium-blue flowers make a show beginning in midsummer. Choose a location with excellent drainage. In regions with clay soils, a raised bed or rock garden will improve success greatly. Plants should be clipped back by half in spring. Attractive to butterflies. Excellent for cutting, fresh or dried. Sometimes known as <i>Lavandula Walberton's Silver Edge</i> . USPP#13091: unlicensed propagation prohibited. Registered with COPF.	6 to 9	24 to 30 inches
Y	Provence	<i>Lavandula x intermedia 'Provence'</i>	'Provence' lavender, is an intermedia, robust grower, good for sachets, and other fragrance products. This variety is not for essential oil product and should only be used sparingly for flavoring.	5 to 9	24 to 30 inches
Y	Seal	<i>Lavandula x intermedia 'Seal'</i>	Long spikes of pale purple flowers. Excellent for cutting and drying. Long narrow, silvery grey, aromatic foliage. A superb large bushy lavender, with a fine display of clear blue-purple flowers and handsome foliage. Introduced in the 1930s.	5 to 11	18 to 24 inches
Y	Sensational	<i>Lavandula x intermedia 'Tesseract' PP31786</i>	Chosen as Best in Show at the 2021 Farwest Show's New Varieties Showcase by a panel of green industry judges out of over 70 new plant entries! Elegant dense flower presentation over mounded habit. Excellent cut flower, with super fragrance and sturdy stems. Broad silver foliage. Requires good drainage. It is beautiful as a low hedge, a massed planting or a garden focal point. 4-inch, edible purple flowers. Compact habit ideal for small spaces. Highly fragrant Well-branched plant with attractive silver foliage. High tolerance to leaf spotting and root disease.	5 to 9	18 to 36 inches
Y	Phenomenal	<i>Lavandula x intermedia Phenomenal USPP 24,193 'Niko'</i>	Named one of the Top 25 New Perennials for 2013 by Better Homes & Gardens! The only intermedia lavender variety with the highest rating in the Chicago Botanical Garden multi-year cold weather hardiness trials, plus it takes heat and humidity very well, and doesn't melt in the US South! Growers from Florida to Georgia to Texas successfully grow Phenomenal Lavender. Lavender Phenomenal has become the new 'gold standard' variety in lavender markets across the globe. Elegant flower presentations, fragrance and high oil content. Ideal choice for floral, culinary and bath & beauty products Go-to variety for landscapers Deer proof and low-maintenance Superb winter hardiness through Zone 5	5 to 9	24 to 30 inches

	<i>Lavandula stoechas</i>	French / Spanish / Butterfly Lavender	Google "lavandula stoechas" and you will find it called "French" and "Spanish" and sometimes "Butterfly" lavender because of its unique flower shape! One of the earliest Lavenders to bloom, this variety puts on a show from early spring to late summer. This lavender has larger flowers with bigger, pine-cone-shaped petals at the top. The flowers alone are quite eye-catching. Carrying a eucalyptus fragrance, Spanish lavenders can tolerate a bit more humidity than most of their relatives. Popular as focal points in courtyard and small-space gardens, Spanish lavenders take well to containers and stylized pruning.		
Y	Anouk	<i>Lavendula Stoechas 'Anouk</i>	Anouk' Lavender has dark purple flowerheads topped with delicate mauve-lilac 'rabbit ears'. Sweetly fragrant, it's perfect for containers or perennial beds where it makes a magnificent focal point.	6 to 10	14 to 18 inches
Y	Kew Red	<i>Lavendula Stoechas 'Kew Red'</i>	Lavender Kew Red standout among French Lavenders because of its unique red flowers with white tops. It blooms from June through August and has a compact upright habit, low-maintenance, and attracts bees to the garden.	7 to 9	12 to 24 inches
	<i>Lavandula dentata</i>	French Lavender	These varieties are well-suited to milder climates without the scare of harsh winters, French lavenders are ornamental plants known for their needle-like, toothed leaves (hence their Latin name – <i>dentata</i>). Their fragrance is lighter than the perfumy English varieties. These plants work well in fast-draining containers and rock gardens, and add a good dose of beauty when lining walkway and entry paths. They prefer full sun and gritty soil.
